Methods

Baselines

> **Plan**
>
> - `randomwalk` and `randomwalknowcast` in full.

Foundation model setup and fine-tuning

> **Plan**
>
> - Foundation model setup and fine-tuning settings.

Synthetic data generation

> **Plan**
>
> - Synthetic data generation in full, with an overview of the epinowcast model used.

Scoring

> **Plan**
>
> - Scoring, and its check against scoringutils.

Implementation

> **Plan**
>
> - The tools we used, each cited: Python, PyTorch on the laptop GPU, chronos-forecasting, PEFT for LoRA, R and epinowcast for simulation, and scoringrules for scoring, checked against scoringutils.
> - The evaluation runs as a Snakemake workflow, so every result can be reproduced from the raw data.

Results

> **Plan**
>
> - Score breakdowns by location and horizon for each case study.
> - WIS over time for each case study.

Held-out synthetic data

German nowcast hub

Ebola hub submissions
